friedrich burgmüller

25 études

faciles et progressives

Op.100

an RZMS edition
www.ruimingzhang.com

This is an excellent collection of etudes designed for early–intermediate piano students. Each of the 25 pieces targets a variety of key techniques, preparing students for the broader Romantic repertoire and helping them develop foundational pianistic skills. While the primary focus is on technique and training, Burgmüller's attention to musicality ensures that these etudes also function as charming, standalone pieces suitable for performance.

This edition of 25 Études faciles et progressives is largely based on the first edition, with modernized notation and minor adjustments to help with readability and reduce ambiguity.
